

Pro Vita C Hand Cream 75 ml

Did you know that...?

- 1** The naturalness index of the new hand cream is **7.2% higher** than in the previous version, and amounts to **96%**. The cream was enriched with natural ingredients that are gentle on the sensitive skin on your hands.
- 2** The rich composition of the hand cream contains **active ingredients, that is ECF vitamin complex, panthenol, shea butter, cocoa butter, mango fruit butter, betaine, trehalose, allantoin, macadamia oil and sweet almond oil**. Ingredients selected in such a way allowed us to create a regenerating and moisturising hand cream for daily care. Together, all these ingredients form a comprehensive formula that soothes, smoothes out, reduces early signs of ageing, restores elasticity, improves skin firmness and forms an occlusive, protective layer.
- 3** The composition was enriched with as many as 5 active ingredients:
 - **panthenol** - thanks to its potent moisturising effect, it is especially recommended in cosmetics for dry skin;
 - **trehalose**, which strongly hydrates the skin and prevents epidermal water loss;
 - **allantoin** has a protective effect on the skin and relieves irritation;
 - **macadamia oil** fosters regeneration, smoothes out the skin and improves its appearance;
 - **sweet almond oil** improves skin elasticity, moisturises and prevents premature ageing of the skin on your hands.
- 4** The hand cream contains three types of butter that provide deep nourishing and hydrating care:
 - **shea butter** derived from the African karite tree. Rich in vitamins A and E, the butter perfectly protects and regenerates the skin, leaving it soft and elastic. Its natural moisturising properties penetrate the skin deeply, nourishing dry and chapped hands.
 - **cocoa butter** is known for its strong caring properties. It is a genuine source of antioxidants that helps fight the signs of skin ageing. Moreover, cocoa butter has intense replenishing effect that provides long-lasting hydration to the hands.
 - **mango fruit** butter is a genuine elixir for our skin. This subtle and fragrant butter is rich in vitamins C and E that strengthen skin structure. Mango fruit butter hydrates the skin, at the same time leaving it silky smooth.These three types of butter work harmoniously, resulting in a cream with pleasant texture and very good properties.
- 5** A perfect proposition **for dry skin of the hands requiring intense hydration caused, for example, by frequent hand washing and disinfection**.
- 6** The ingredients of the cream are selected to work together, and **their synergistic action helps improve the condition of the sensitive skin of your hands**.
- 7** **Small, handy, convenient tube** that you can always have with you.
- 8** A very **pleasant, subtle citrus scent** that lingers on the hands after application.
